T:= {(S,0), SER}
  (Jégoulie (x,t)→(z,s)
(1) X_{z=X}, X(0,s)=s

t_{z=1}, t(0,s)=0
 H EFIOWOR EXEL TIZEOV TO LOPGO:
 2 \begin{cases} U_{\tau} = U \\ U(0,s) = s^2 \end{cases}
(1) \Rightarrow x(\tau,s) = C \cdot e^{\tau} \xrightarrow{\times (0,s) = s} x(\tau,s) = s \cdot e^{\tau}
         t(z,s) = c + z \xrightarrow{t(0,s)=0} t = z
(1) \Rightarrow \times = s \cdot e^{\tau}, \ t = \tau \implies s = \times \cdot e^{-t}
           (\tau, s) \longrightarrow (x, t)
H JUON LOU EIVAL:
       U(x,t) = x^2 e^{-2t} e^t
  =\rangle |U(x,t)=x^2e^{-t}
